eMILPO Update

- Live on 1 August 2003
- Next generation of the Army's personnel database; bridge to DIMHRS
- Single field database breaks down geo barriers and improves accuracy
- eMILPO application is simple; intuitive; field is generally satisfied
- 93% of initial transactions processed successfully at activation; sustained rate of -96% (good thing)
- Interfaces secured with high success rates
- Datastore was slow; sporadic problems in report population/ reports built off of the eMILPO application now have standard return times; rebuild of accounts/access to Datastore
- Facilitates Personnel Accounting w/ TCS done with attachment, reason code 'D'; Sign of Life Arrivals
- Facilitates Mobilization *

Mobilization

1. Solider arrives at Mob site
2. eMILPO retrieves soldier's record from ITAPDB
3. eMILPO updates eMILPO
4. Transaction 4056 sent to TAPDB AE/AO but TAPDB may not recognize the soldier
5. Transaction placed in recycle
6. TAPDB request soldier bundle from RC TAPDB
7. Bundle sent through ICDT
8. Transaction comes out of recycle and processes; soldier converted to AD

TAPDB requests soldier bundle

- ## Self-service MYERB available on-line 23 December 2003
- ## ICON on HRC-A and HRC-I (EREC) websites
  - AKO Authentication
  - Data not more than one-hour old from production database
  - 376,174 hits as of 17 May 04
  - Primarily NCOs
- ## Self-Service MYERB With Photo online 2 February 2004
  - Link from DAPMIS
  - 17, 796 Photo ERBs Generated as of 17 May 04

Patient Tracking

- Allows Army commanders for the first time to determine:
  - Where the Soldier is in the medical regulating process
  - How the Soldier is doing
- OTSG has lead to input and manage patient information
  - 231 Accounts built (15 May 04)
- Accounts built for various medical facilities
- 1,582 Soldiers Currently Being Tracked in this module (15 May 04)
- 2,529 Total Records Entered in Patient Tracking since inception

Upcoming Functional Improvements (ICH)

- Initiative to get NG records propositioned in eMILPO (to facilitate mobilization and preparation)
- Separate Overseas Tour Credit from Asgn History
- ✓ New DIEMS Transaction   (Fielded May 04)
- Date of Last PCS
- Deceased de-linked from Transition Screen
- Display of SQIs – order of precedence
- Add DA Photo for SSG & above (eMILPO ERB)
- Mass Produce ERBs (by UIC)
- Correspondence Course Length (Change to 4 char)

Upcoming Functional Improvements

ICP
- Adjustments to various Reports
- Help/User Manual Updates throughout
- Processing of EDAS Cycles
- Minor Changes to SGLI/DD93

SCP
- Enlisted Technical Certifications
- Merge PERSTEMPO & eMILPO
- eMILPO Feed to DTAS

eMILPO Update

- Data cleansing (continuous)
  - Personnel Accountability Issues between TAPDB & eMILPO
  - HIV
  - DIEMS
  - Blank Data (GR, SEX, etc.)
  - Various data discrepancies between Field and TAPDB

- Improved Interface ATTRS to TAPDB
  - ✓ Military Education Courses automatically fed to eMILPO (Partially fielded)
  - Less duplication of input
